## **Stage**

Please provide a nice, sturdy and flat stage measuring at least 7 x 4 metres.

## **PA**

Please provide a professional PA system adequate for the venue and setup for the best possible coverage of the audience area. Make sure that a tech is present at the venue from load-in to end of show.

## **FOH & Monitoring**

Minimum 24 channel (+4x ST FX return) professionell mixing console

## **Monitors**

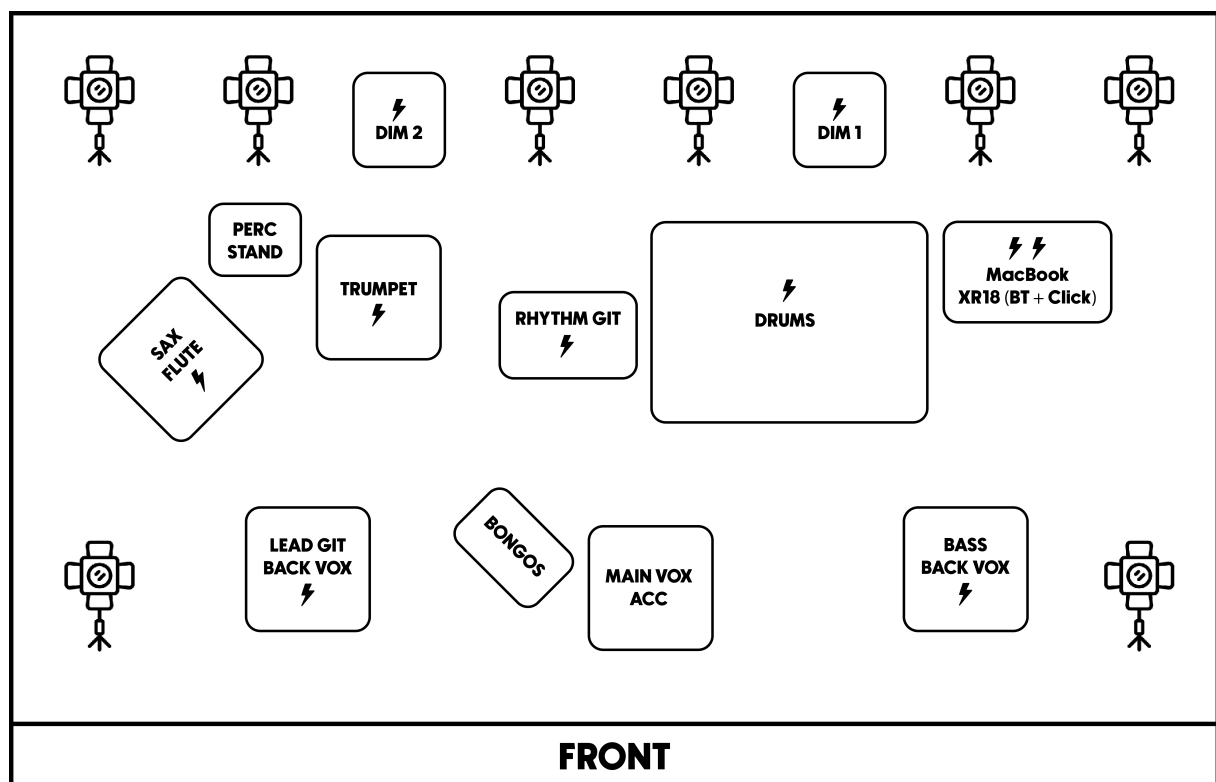

We need 5 mono monitor ways for the band and 1 stereo for the main vocalist on XLR – all are wired IEM except for the vocalist.

## **Technical Crew**

We are traveling **without** our own sound engineer. We kindly ask for an experienced in-house technical team for sound and lighting.

We are easy to work with and happy to assist wherever possible to ensure a smooth and great show.

## **Accommodation**

7 beds in a nice, quiet hostel/hotel with breakfast would be great! If it's a clean, comfortable place where we can take a shower, a privat accommodation (shared flats) is also ok.

## **Transport & Parking**

RUHMER travel in a **van + trailer**. To avoid the usual parking problems we would like to ask you to figure out where the band can park their van + trailer before arrival!

Thank you very much for your consideration!

**Thank you for your efforts, but we know - sometimes it's only Rock'n'Roll and if our demands can not meet with your resources please let us know!**
